

I put 15 apples equally on 3 plates.

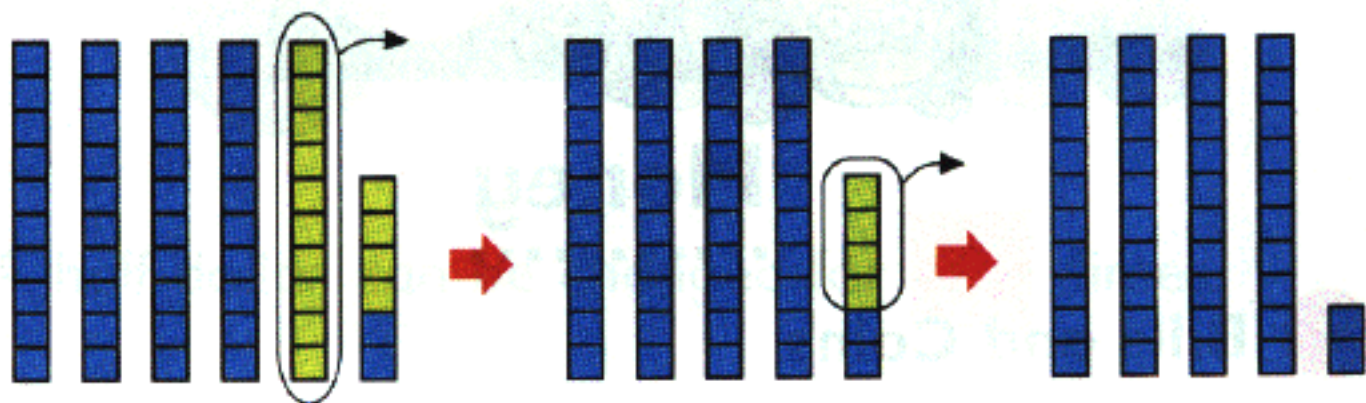

Divide 15 apples into 3 equal groups.

There are apples in each group.

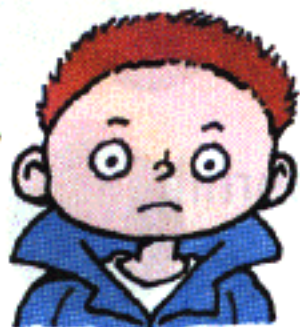

5. Subtract 14 from 56.

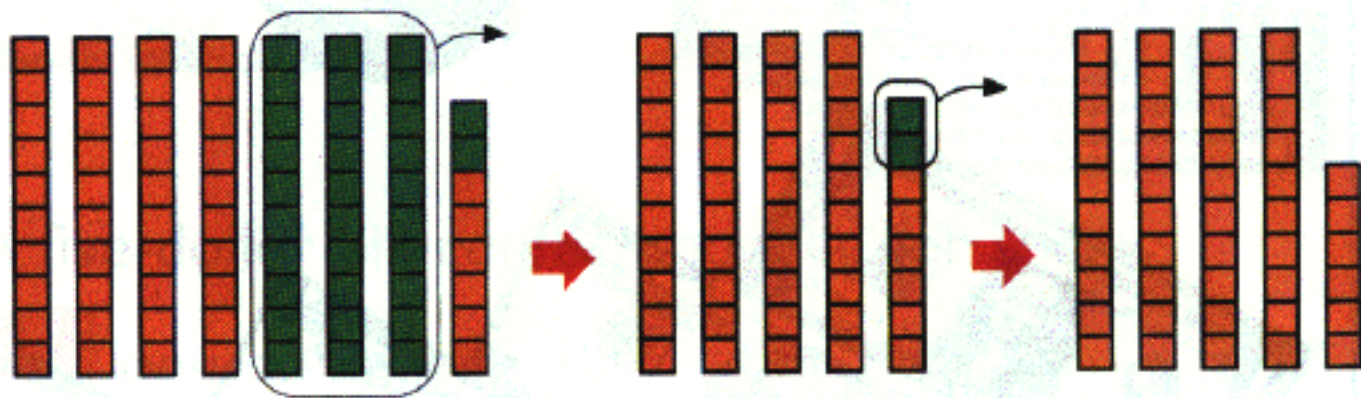

$$56 - 14 = \square$$

$$56 - 10 - 4$$

6. Subtract 32 from 78.

$$78 - 32 = \square$$

$$78 - 30 - 2$$

A half-dollar can be changed for dimes.

A one-dollar bill can be changed for dimes.

A five-dollar bill can be changed for one-dollar bills.

A ten-dollar bill can be changed for five-dollar bills.
